

Product Sheet – Electrical Stunning Equipment

Electrical Stunning Equipment

It performs the stunning of the poultry constantly incoming on the upper line, in compliance with the required technological parameters and animal welfare standards. This is a prerequisite for the high quality final product, and this promotes proper bleeding and plucking as well.

Our stunning equipment is a so-called water-electric stunning equipment, it performs the stunning with electricity, with the help of water. The parts of the equipment are made of stainless steel and plastic. The electrical stunning equipment operates on an adjustable frequency between 50-400 Hz.

Type

VK-01/97

Technical parameters

Water Connection:	C1/2" (16-20°C)
Waste water Connection:	NA 50
Electricity:	800 W (230 V/50 HZ)

Used materials

Compliance with the food industrial and hygienic regulations are important for us, therefore we use only stainless steel, aluminium, and food industrial plastic by producing our machines.
